Quick Guide

DMP gauge family

for coating thickness measurement

valid for the following gauge types

DELTASCOPE® DMP10 ISOSCOPE® DMP10 DUALSCOPE® DMP20 DELTASCOPE® DMP30 ISOSCOPE® DMP30 DUALSCOPE® DMP40 SR-SCOPE® DMP30

Observe the safety information and follow the instructions in operator's manual!

Detailed operator's manuals and the free-of-charge software program Tactile Suite for data evaluation and archiving can be downloaded from: https://docs.helmut-fischer.com/uum

First Steps – Initial set up

The gauge is in factory delivery condition.

- 1. Insert the rechargeable battery into the gauge.
- 2. Charge the rechargeable battery.
- 3. Connect a probe to the gauge.
- 4. Switch on the gauge: press the key [🕑] for about 2 s
- Follow the start routine and set the language, line frequency of local power supply (not SR-SCOPE[®] DMP30), date and time.

The main menu appears and the initial set up is finished.

What you can do next

- DMP30/40 types: Define a new application (batch)
- DMP10/20 types: Define your application (batch settings)

Gauge description

Fischer-

4

- 1 Battery comp. lid, Bluetooth®
- 2 USB plug, under the lock lug of the compartment lid
- 3 Visual signal strip
- 4 Display
- 5 Operation keys [₩]: on/off [Ħ]: calls up main menu < ↔ >: selects
- 6 Plug for probe connection and battery fast charging7 Gauge foot

Navigation with the gauge keys

Display	Key	Function	
\$	∧ up ✓ down	Selects – parameter/value	
ОК	>	Confirms – selection/setting Moves – cursor to the right	
5	<	Exits – page/menu Moves – cursor to the left	
Ţ	<	Opens the Measurement view	
۲	>	Opens calibration/calibration menu	

Battery inserting/removing

Type RRC 1130 (3.8 V · 3.81 Ah · 14.47 Wh (supplied))

Charge battery

Charge the battery before the first use.

- USB charger: 2.4 A, 5 V---; battery temp.: 0 ... 45 °C (32 ... 113 °F)
- = active charging, = charging finished, Charging status enabled by switched-off gauge only
- Connect the gauge directly to the PC via a USB cable type C/A (supplied) or to the power supply via a commercially available USB charger.

2. Disconnect the connection when the battery is fully charged.

Connect the probe

 Connect the probe only when the gauge is switched-off!

Digital probes (D.,.) with USB C female jack

Use USB C cable (supplied) to connect the gauge with the probe:

Analog probes (F...) with 12-pin male jack

Plug in the jack of the probe cable to the DMP-F-Probe-Adapter (1007336):

Switch gauge on/off

Press and hold the [b] key for approx. 2 s.

After switching on, the display shows the main menu or Measurement view of the batch that was open when the gauge was switched off.

Perform measurements

- 1. For DMP30/40 types only, open the measurement view of the desired batch: > Batches > OK > select desired batch > OK > MEASURE > OK
- 2. All gauge types: Measure, place the probe vertical onto the test piece (example probe D-FN).

Call up evaluation

Open the evaluation menu of the open batch: => Statistics > 0K

Define new application (batch)

Possible for DMP30/40 types only.

Batches > OK > New > OK > select desired calibration > **OK** > select desired function(s) and make desired setting(s) > MEASURE

Define application – Batch settings

Signal of meas. acquisition (visible, audible)
unit measurement mode (Single Reading, Free Run) = ...

Make the desired batch settings for the open batch: \blacksquare > Batch Modify > OK > select desired function(s) and make desired setting(s)

Define application – Calibration

Perform a calibration: = > Calibrations > OK > select desired calibration > OK > CALIBRATE > follow the routine and perform the displayed calibration steps

Check calibration

- 1. Set test parameters: = > Calibrations > OK > select desired calibration > OK > Def. Cal. Check > **OK >** select/set the desired test parameters
- 2. Perform the check routine: \blacksquare > Calibrations > OK > select the desired calibration > OK > Check Cali**bration > OK >** perform the test measurements according to the check routine

Data transfer by Tactile Suite software only

Connect the gauge via USB or Bluetooth® (DMP30/40 types only) with the PC, on which the software Tactile Suite is installed

> Call up the Tactile Suite and select your connected gauge.

The software immediately gives an overview of batches and data stored on the gauge.

How to use the Tactile Suite, please refer to the software operator's manual.

Gauge settings

Language Display settings audible and visible signals
Date & Time
locking selected calibrations
...

Make the desired gauge settings: Sauge Settings > OK > select the desired function(s) > OK > make the desired function setting(s)
